Hiring Committee
Center for People & Environ- CPE

Subject: Application for Field Enumerator/Research Assistant Position

Dear Hiring Committee,

I am writing to express my interest in the short-term field research position focused on health, climate, and environmental data collection. With a strong academic foundation in environmental science and over 4 years of experience in data analysis—including 2 years in quantitative and qualitative research—I am confident in my ability to contribute effectively to your project in coastal and haor regions.

Recently I've graduated from University of Dhaka, majoring in Soil, Water, and Environment. My academic journey has been complemented by hands-on experience in field-based data collection, particularly in public health and water quality projects. I have utilized tools like Kobo Toolbox and SurveyCTO to conduct structured surveys and in-depth interviews on topics ranging from disaster risk to indigenous health practices.

As a section leader in Stanford University's Code in Place 2025, I have further developed my communication and mentoring skills—assets that I bring into any team-based, field-driven environment. My commitment to accuracy, ethical research, and community engagement makes me a strong fit for this position.

I am excited by the opportunity to contribute to your impactful research initiative and would be honored to assist in collecting data that supports sustainable health and environmental strategies. I am available for the full duration of the assignment and open to deployment in coastal or haor regions.

Thank you for considering my application. I look forward to the opportunity to discuss how I can support your team's objectives.

Sincerely,
Md. Rakib Hasan
