Subject: Application for Enumerator Pool

Dear Recruitment Committee,

I am writing to express my interest in joining your Enumerator Pool for upcoming field research activities. I have recently graduated from the University of Dhaka in Soil, Water and Environment. With a strong academic background and over 4 years of experience in data analysis—including 2 years in field-based quantitative and qualitative research—I am confident in my ability to support high-quality data collection in health, environment, and disaster-related projects.

I have worked on multiple research initiatives involving Kobo Toolbox, SurveyCTO, and remote sensing tools like Google Earth Engine, with a focus on topics like water quality, public health, and climate resilience. These experiences have equipped me with field coordination skills, ethical research practices, and effective communication with diverse stakeholders.

Additionally, I am currently serving as a Section Leader in Stanford University's Code in Place 2025 program, mentoring students from across the world in structured programming, which has enhanced my teamwork, problem-solving, and leadership abilities.

I am committed, detail-oriented, and ready to work in challenging situations. I look forward to contributing to your impactful research initiatives and hope to be considered for the Enumerator Pool.

Thank you for your time and consideration.

Sincerely,
Md. Rakib Hasan
