

# MD RAKIB HASAN

An aspirational graduate in Soil, Water, and Environment from the University of Dhaka, with 4 years of experience in data analysis and over 2 years of interdisciplinary research. Passionate about using data-driven insights to address pressing social and environmental challenges, including water quality, public health, and sustainable development. Experienced in community engagement through 1.5 years of volunteer work, collaborating with local stakeholders to design and host workshops focused on mentorship and technical training for young technology enthusiasts.

## Contact Information

- Dhaka, Bangladesh
- in/rakibhhridoy
- /rakibhhridoy
- +8801875545062
- www.rakibhhridoy.xyz
- rakibhhridoy@yahoo.com

## Areas of Expertise

### SOCIAL IMPACT RESEARCH

- Environmental Health Risk Assessment
- Public Health Hazards Monitoring
- Ground & Surface Water Quality
- Variable Impact Monitoring

### DATA FOR DEVELOPMENT

- Real Time Monitoring (ArcGIS+Python)
- Remote Sensing (Google Earth Engine)
- Data analysis (Python, R, SQL)
- GIS Mapping (ArcGIS, QGIS)

### SUSTAINABILITY & RESILIENCE

- Disaster Risk Assessment & Monitoring
- Climate Adaptation Workflow
- Resource Management

### PROJECT MANAGEMENT

- NGO Program Coordination
- Grant Reporting Monitoring & Evaluation (M&E)

### COMMUNITY ENGAGEMENT

- Stakeholder Collaboration
- Participatory Research
- Fieldwork

### ADDITIONAL TECHNICAL SKILLS

- Communication & Presentation
- Data Handling (Pandas, Numpy)
- CI/CD Tools (Docker, Kubernetes)
- ML/DL (TensorFlow, PyTorch)

## Certification

- Google IT Support Professional
- Google IT Automation With Python
- Google Cloud: Cloud Architect
- Mathematics for Machine Learning
- DataOps with Apache Iceberg using Spark, Nessie, and Dremio

## Educational Qualification

- University of Dhaka; B.Sc in Soil, Water & Environment** Jan 2020- Feb 2025  
CGPA: 3.62/4.00;  
Research Project: Health Risk Assessment from Heavy Metals in Dried Fish of Dhaka.
- Higher Secondary Certificate (HSC)** Graduated in 2019  
Letter Grade: A (Science), Government Bangla College
- Secondary School Certificate (SSC)** Graduated in 2017  
Letter Grade: A+ (Science), Lalmatia Housing Society School & College

## Professional Experience

### Stanford University; Code In Place 2025

- Section Leader March 2025 - May 2025
  - Led the class of 9 international students to teach CS106A/B program of Stanford University Syllabus. Provided detailed feedback and grading on assignments and exams.
  - Collaborating with Dr. Chris Piech & Dr. Mehran Sahami to enhance course materials.

### Atomic Energy Center; Bangladesh Atomic Energy Commission

- Research Assistant Mar 2024 - Nov 2024
  - Developed and deployed deep learning models using TensorFlow and Scikit-Learn for water quality forecasting, enhancing environmental monitoring of the Turag, Buriganga, Shitalakshya, Dhaleshwari, and Balu rivers.
  - Analyzed water pollution dynamics and documented findings in 7+ study, contributing to 10+ journal articles.

### University of Dhaka; Department of Soil, Water And Environment

- Research Assistant Mar 2023 - Nov 2024
  - Led 15+ analytical chemistry and deep learning projects to assess the impact of soil, sediment, and water quality on human health, analyzing over 500 samples across the Gangetic Delta.
  - Used 5+ mathematical and statistical approaches to improve soil organic carbon (SOC) model accuracy by 15%. Contributed to 7+ peer-reviewed journal articles.

## Project

### Water Quality Modeling Using Enhanced CNN, RNN, LSTM, GRU of Turag

- Analyzed Turag River water and developed a novel method for modeling dissolved oxygen (DO) and biological oxygen demand (BOD) using stacked CNN, RNN, LSTM, and GRU models, in collaboration with Atomic Energy Center.
- Deep learning models outperformed machine learning models, improving accuracy by 3.88%, reducing errors by 7.41%, and increasing reliability by 95.56%.

### Ground Water Arsenic Pollution Modeling Using Ensemble Techniques

- Analyzed groundwater from 909 wells to assess Arsenic pollution and developed a novel ensemble technique using multi-scalar data fusion (soil, climatic, anthropogenic, satellite imagery) for prediction.
- The approach is expected to improve prediction accuracy by 5-10% compared to traditional deep learning models. The project was collaborated with Dr. Anwar Zahid\* from the Institute of Water Modeling, BWDB on the project.
